EXPERIENCE

Merck

UX Researcher & Strategist | November 2021 – Present

- Lead all user experience research and design initiatives for products that enable experiment design and execution within Merck Research Labs' IT group.

CVS Health

UX Researcher | June 2019 – October 2020

Senior UX Researcher | October 2020 – November 2021

- Articulated, scoped, and prioritized research objectives for eight agile teams during Program Increment (PI) planning.
- Planned and conducted generative and evaluative qualitative studies, primarily user interviews and task-based usability tests, to help partners and stakeholders learn about current-state experiences and begin to strategize for future-state products in the product areas of MinuteClinic and HealthHUB.
- Developed departmental research processes and practices, especially regarding ResearchOps (tools) and inclusion and diversity.

University of Michigan, School of Information

Research Assistant | March 2019 – May 2020

- Collaborated with three U-M professors to facilitate more than 20 ninety-minute interviews with LGBTQ+ people who had experienced pregnancy loss.
- Conducted thematic analysis and coded interview transcripts in Dedoose.
- Contributed to academic articles about how technology can better support marginalized people who experience pregnancy loss.

University of Michigan, Center for Academic Innovation

Behavioral Science Fellow | September 2018 – May 2019

- Designed and executed surveys, interviews, and usability studies of student tools in the Center's portfolio, including eCoach, Tandem and Sage.
- Analyzed and synthesized learnings and presented findings and actionable recommendations to design and development teams.

Dassault Systèmes

UX Research & Design Intern | May 2018 – August 2018

- Contributed to brand UX specifications, developed templates for task analysis, designed user surveys, and planned in-person and remote usability studies.

University of Michigan, Office of Enrollment Management

UX Research Intern | October 2017 – May 2019

- Interviewed stakeholders and engaged them in participatory design activities to learn how data related to recruitment, applications, and events were managed.
- Analyzed and synthesized learnings and presented findings and actionable recommendations to stakeholders to facilitate data-informed decisions regarding the adoption and implementation of CRM tools.

The Dow Chemical Company

Information Management Specialist | July 2016 – August 2017

- Distilled 150+ complex work process modules into clear, simple instructional documentation sets in accordance with corporate and functional standards.
- Collaborated with content owners and SMEs in cross-functional teams to develop, edit, test, and maintain content updates to multi-tenant intranet sites.

EDUCATION

Master of Science in Information

Specialization: UX Research & Design
The University of Michigan (U-M), 2019

Bachelor of Arts in Professional &
Technical Writing

magna cum laude

Saginaw Valley State University, 2017
Outstanding Program Graduate

SKILLS & STRENGTHS

Research

Execution Methods:

- Card sorts
- Competitive analyses
- Contextual inquiries
- Heuristic evaluations
- Surveys
- Task analyses
- Tree tests
- Usability tests
- User interviews
- Workshops

Synthesis Methods:

- Affinity diagrams
- Flow models
- Thematic analysis
- User personas and stories

Design

- Interaction and experience design
- Prototyping (low- and high-fidelity)
- Storyboarding
- Wireframing

Writing

- Content strategy
- Instructional documentation
- Microcopy, UX writing
- News reporting
- Technical writing and editing

Programming

- HTML5, CSS3
- JavaScript, TypeScript
- PHP
- Python 3
- SQLite
